The nationality distribution of the workforce in care homes without nursing was 77% British, 17% non-EU and 5% EU. This was similar to the diversity seen across all main care service types. The proportion of British workers in care home without nursing services remained similar between 2017/18 and 2021/22, however since 2021/22 the proportion of British workers has

Further information

We provide valuable workforce intelligence which the Government, strategic bodies, employers, and individuals rely upon to help them make decisions that will improve outcomes for the people who use care services. In addition to this publication, we produce and analyse workforce estimates at national, regional and local levels. This allows for greater scrutiny of the sector and its workforce and helps support local decision making in these geographical areas.

National information

This summary accompanies our flagship publication: [The state of the adult social care sector and workforce in England](#). This report analyses the size and structure of the workforce, as well as key workforce characteristics and additional analysis on international recruitment and factors affecting turnover and CQC ratings.

Regional information

We have data visualisations and written reports which provide an annual overview of adult social care services and the workforce in each region. We have two data visualisations that show regional information: one looks at one region at a time, the other looks at key variables and compares the nine regions. Alongside these data visualisations are nine regional written summaries.

Local area information

There are six pages of local area information on our website, these are split by either local authority area or NHS Integrated Care Board (ICB) geography area.

Individual areas: we have one report looking at the workforce in each local authority area or ICB area, one at a time.

Our comparison reports compare key variables across local areas or ICB areas

Each local area has a written summary report, summarising the workforce statistics.

Our 'My ICB area (MH and LD&A)' report shows the latest information from the ASC-WDS for the mental health and learning disability and/or autism workforces, split into ICB areas.

We also publish [tracking information](#) about the adult social care workforce in key areas on a monthly and quarterly basis. These trackers do not use weighted estimates (as shown in our other annual reports) but do give a good indication of moving trends through the year. Trackers are available for recruitment and retention, fill7dl i 0 1 128.06 223.7 T2(i 0 12ETQq12 Tf1 0 0stim)-6(a)-3
